Bubbly rock: a larger sized defunct network,

The suspicious mass appears to have been dissected and sampled with a rectangular area that appears to have been scraped with a flat blade to remove the top fraction of fines; a narrow trench at QUADRANT 1. These are two suspected bone masses both of smaller organisms that were blanketed in the residue from the expired larger defunct network,

A suspected smashed fountain, smoke stack or heavy artillery; a faucet like construction close to the toppled and broken column; There appears to be a lot of water ice at this site. There is a bent bar that has a curve to it that is somewhat stylized; a large circumference wheel, mounted close to the base of the fallen column,

Wonderful art found here: The station is close to the meandering trickle at the bottom of the draw between the headlands of the estuary intertidal area vestiges.

The exact location is not clearly known but lays between the two listed lat and longs from sol 1231 to sol 1244 a distance of 93.1 meters.

A relief of a battle scene with good quality visibility: A helmet wearing man attacking a winged being, The relief rests between the stations at 1274 and 1279, closer to station for sol 1274 which includes some carved figurines and iconic engravings, cursive verse, and the ruined fort that is at that locality. The stretch of 179.87 meters in question is from N 77,29919314 X E 18,47653599 to the station at sol 1279 which corresponds to N 77.29956865 X E 18.47399202, 179.87 meters distant and covered the distance over only 5 sols.
